We understand the process of combing through the enterprise to collect, organize and analyze data to assess operational realities. Our reputation has been built by taking large amounts of data and information and communicating all of it in such a way that is easy forall stakeholders and decision makers to understand. We pride ourselves on showing our customers new and innovative ways of looking at their internal data and ensuring outcomes that improve their bottom line and exceed supplier diversity goals. We welcome the conversation on how we can take our competencies from supporting our clients to maximizing and streamlining processes throughout your supplier base.

Why LAISAR?

- Our work gives us a unique insight into the supplier base
- Our best practices are unique, scalable and can work in any of the local markets where you are located
- We understand and have actively worked on the full life cycle of supplier diversity as well asenterprise supplier management programs
- Our programs intersect with DE&I platforms for talent optimization, bias-neutrality and inclusivity across the enterprise
- We deploy a proprietary web-enabled application for vendor management. This proven environment will provide real-time access to hosted data and will measure the economic andsocial impact of program spend at each of your locations and throughout the enterprise
- We are committed and vested in the ongoing success of your supplier diversityinitiatives
